CREATIVE STORAGE BAGS (430)

REMARKABLY REUSABLE, CONVENIENT AND RELIABLE
CELL FIB IS STRONG AND HIGHLY RESISTANT TO TEARS AND PUNCTURES, SO BAGS MADE FROM IT CAN BE USED AGAIN AND AGAIN. CELL FIB RESISTS STAINS SO KEEPING THESE BAGS CLEAN IS EASY — CELL FIB IS MACHINE WASHABLE OR SPOT CLEANABLE — THEN SIMPLY HANG TO DRY. CELL FIB BAGS ARE VERY LIGHTWEIGHT, SOFT AND “SCRUNCHABLE” AND FIT EASILY INTO PURSE OR POCKET FOR CONVENIENCE.
RESPONSIBLY RECYCLABLE
ALTHOUGH CELL FIB BAGS CAN BE USED AGAIN AND AGAIN; THEY ARE 100% RECYCLABLE AND CAN BE RETURNED TO GROCERY STORE BAG RECYCLING BINS (UNLIKE OTHER REUSABLE BAGS WHICH ARE NOT RECYCLABLE AT ALL.)

MAXIMUM VERSATILITY
THE SOFT TOUCH AND SMOOTH TEXTURE OF CELL FIB MAKE IT EASY TO MACHINE. IT'S FLEXIBLE, FOLDABLE AND SEWABLE, ALLOWING FOR LIMITLESS POSSIBILITIES. CELL FIB CAN ALSO BE EASILY COATED, EMBOSSED, GLUED, HOT FOIL STAMPED, LAMINATED, MACHINE OR DIE CUT, PERFORATED AND PUNCHED, WELDED AND HEAT SEALED. WHEN WASHING, IT'S BEST TO USE COOLER TEMPERATURES. WHEN EXPOSED TO HEAT, CELL FIB BEGINS TO SHRINK AT APPROXIMATELY 220OF (104OC) AND MELTS AT 275OF (135OC). FOR THIS REASON, HANG TO DRY.
