Symbols glossary

	4 stars freezing compartment for better food preservation.		The automatic defrost system works by automatically defrosting at regular intervals eliminating the need to defrost altogether.
	Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.		LED display: to show programmes, functions and options selected and the time to the end of the cycle.
	Ventilated: Forced distribution of cold air in the refrigerator compartment, which allows even temperature distribution within the fridge.		Fast freezing: The fast freezing function brings the temperature of the compartment down when activated a few hours prior to usage.
	Fingerprint proof stainless steel: Fingerprint proof stainless steel keeps stainless steel looking as good as new.		LED interior lighting: is a more energy efficient and long lasting way of illuminating the interior of the appliance.
	Smeg's evolution towards more intelligent and eco-friendly models has led to the choice of Inverter technology, which significantly reduces consumption.		Air plus: keeps food fresher for longer.
	No Frost: The No Frost and Frost free systems prevent ice from forming so that no defrosting is required.
