

BRONZ

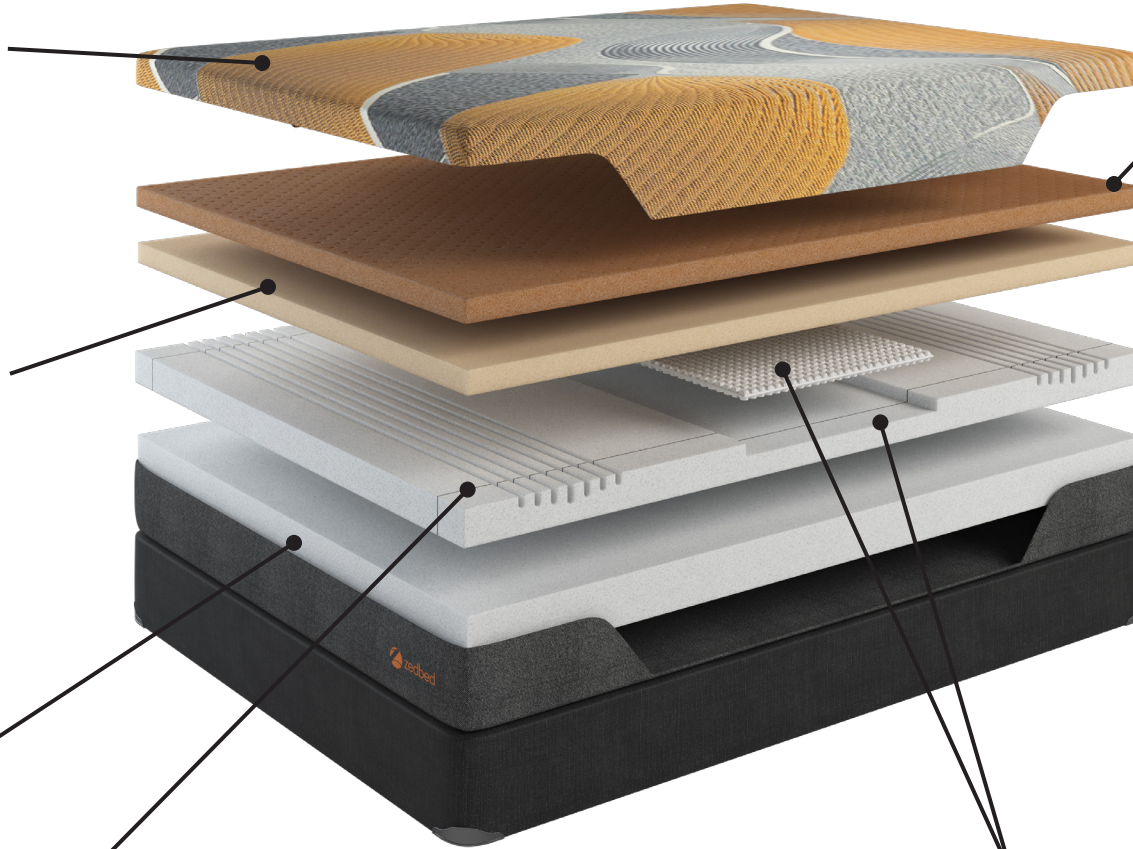

SEMI-FIRM

HEIGHT : 11"

COOLING FABRIC

The mattress's cooling fabric provides a feeling of optimal comfort by regulating body temperature promoting a cooler sleep by dispersing heat and enhancing your sleep quality.

VX PERFORATED COPPER (2")

VX foam combines the comfort of memory foam with the support of high-density foam for improved blood circulation. This unique and exclusive Zedbed foam resists reacting to body heat and ambient air. The comfort of the mattress remains comfortable night after night, in all seasons. Combined with PERFOR-PRO® perforation, the thousands of open cells allow air to circulate freely while maintaining the body at an ideal temperature for a restful sleep. Copper is also known for its resistance to repel dust mites and bedbugs.

RAPID RECOVERY HYBRID FOAM (1")

The Rapid Recovery hybrid foam provides an intensive muscular release without increasing the firmness to the mattress.

CEL CAR BASE (5")

Base made from renewable soy extracts, providing increased support.

SIDE REINFORCEMENT WITH VENTILATION CHANNELS

A side reinforcement has been fitted for added support providing durability and greater resistance.

ARTICULATED BASE 1 (3") WITH CENTRAL LAYER OF MINI POCKET SPRINGS

DESIGNED FOR EFFECTIVE SUPPORT: Mini pocket springs are added to the central layer providing a gradual support from head to toe, ensuring an even lumbar support.
