HOME ESPRESSO MACHINE

PRO-LEVEL VARIABLE PRESSURE

With customizable extraction curves, users can explore the different flavors of coffee

COFFEE BOILER INTEGRATED WITH SATURATED BREW GROUP

Temperature control
Ensure stable extraction and constant temperature

TWO-BOILER

0.8l coffee boiler integrated with saturated brew group & 1.8l steam boiler

IOT APP CONTROL

Tablet/Mobile APP control
Freestyle creation, instant adjustment, share anytime

AI SMART MATRIX

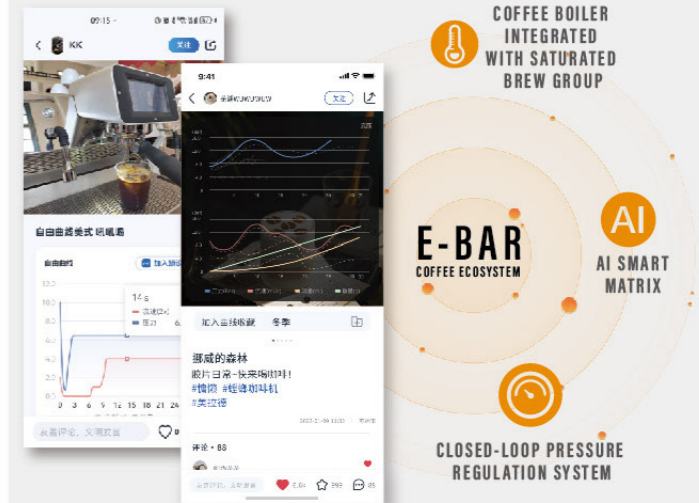

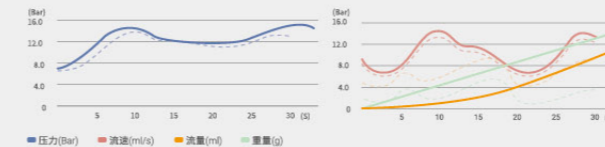

Automatic matching of extraction, intelligent adjustment for optimal extraction

PRO-LEVEL VARIABLE PRESSURE TWO CONFIGURATIONS AVAILABLE

Built-in commercial-grade variable pressure gear pump/self-developed vibration pump, custom extraction curves, explore the different flavors of coffee

Based on real-time pressure feedback and self-adjustment, it ensures that the pressure of the pipeline chases the target value and remains consistent with the target pressure.

WENDOUGEE IOT E-BAR

WENDOUGEE E-BAR app creates an integrated platform for control, sharing, downloading and interaction with coffee as the core.

- 2800w Heating Power
- 1.8l Steam Boiler
- 0.8l Coffee Boiler Integrated With Saturated Brew Group

Independent boilers for steam & coffee

COFFEE BOILER INTEGRATED WITH SATURATED BREW GROUP

Integrated saturated brew group for more stable extraction temperature, especially suitable for high-volume stores

Real-time monitoring of espresso machine extraction time, flow rate, and other parameters enables synchronized analysis of extraction status. Feedback signals are sent to the coffee grinder, initiating automatic adjustment of grinding parameters for optimal extraction.
