Only from Roomba®, the 205 DustCompactor™ Vac Robot raises the cleaning bar with the industry's first-ever mechanical debris compactor right onboard. Dirt and dust are suctioned up, continuously compacted, and contained inside the robot for up to 60 days at a time. The 3-stage Vacuuming System combines 70X more\* power-lifting suction, a rubber brush that grabs all kinds of debris from crumbs in the kitchen to sandy footprints in the entry, and a corner brush that reaches into tight spaces and pulls up dust-bunnies wherever they gather. ClearView™ LiDAR ensures fast mapping, navigation & complete room coverage, while safely avoiding obstacles. With its first-of-a-kind mechanical compacting system, there's no need for a separate self-emptying dock to clutter up your beautiful floors. \*As compared to Roomba® 600 series robots
