

Hisense White 24- in 4.5 cu. ft. Front Load Dryer with Ventless Heat Pump Technology and Wi-Fi Enabled (ConnectLife App)

The Hisense 24-inch ventless heat pump dryer, with a 4.5 cu. ft. capacity, delivers powerful performance with energy savings, making it perfect for eco-conscious households. Despite its compact size, it boasts one of the largest capacities in its class. Designed for urban living, it features a reversible door and stackable design (kit included) for flexible installation. Smart Link technology auto-selects the ideal drying cycle based on the previous wash. Enjoy Quick Dry in just 30-minutes, Allergy Care for hygienic results, Anti-Wrinkle care to reduce creases, customizable dryness levels, and precise, sensor-based drying for optimal fabric protection. Rack Dry (included) offers flexible drying for shoes, toys, and cashmere fabrics, while gently protecting every item.

Wi-Fi Enabled with ConnectLife App – Smart Control

The ConnectLife app lets you choose fabric type and colour to deliver perfectly dry clothes, using the ideal combination of time and temperature. Keeps your wardrobe looking like new.

Quick Dry

Save time and energy with a 30-minute Quick Dry cycle, delivering the same effective results as standard drying cycles in half the time. Based on a 1.5 lbs load.

Large Capacity

The 4.5 cu. ft. capacity gives you room to dry bulky items like towels and bedding in a single cycle. Fewer loads mean less time doing laundry and more time for you.

Sensor Dry

A built-in high-precision sensor monitors the residual water level and temperature. Automatic adjustment of drying time helps save time, energy, and prevents excessive heat damage to clothing.

Wrinkle Care

No more ironing after washing—the drum stops heating and gently tumbles every 5 minutes to keep clothes from sitting too long in one spot, helping prevent wrinkles.

Smart Link: Washer-to-Dryer Sync

Smart Link intelligently calculates the optimal drying cycle based on the washing cycle and seamlessly communicates this to the Hisense dryer, which automatically chooses drying cycle by itself. Only available when both Hisense washing machine and dryer are connected through the ConnectLife app.

Heat Pump

The Hisense ventless heat pump dryer uses less energy and dries clothes gently at low temperatures to protect fabrics. Ventless and easy to install, it is perfect for small spaces. Features like the “Damp” option and warm air recycling boost efficiency, cut energy bills, and reduce maintenance. Smart, gentle, and cost-effective—it’s the ideal laundry upgrade.

Rack Dry (Rack Included)

The flexible drying rack gives you the freedom to dry items like shoes, plush toys, or delicate cashmere with care. It adapts to your needs while gently protecting your fabrics.

Allergy Care

The sterilization drying uses high-temperature hot air, which kills microbes and leaves your clothes clean and dry.

Drying Cycle Options

The Hisense dryer features 17 built-in cycles to manage all types of laundry, from quick drying to bulky loads. With 6 temperature and dryness level settings, you can easily adjust each cycle to protect fabrics and ensure optimal drying performance.

Refresh Cycle

Perfect for lightly worn clothes, the 10-minute cycle uses circulating air to remove unpleasant odours without high heat, making it quick and incredibly efficient.

Drum Light

Once your clothes have finished drying, the drum light stays on as a reminder to take them out.

KEY FEATURES

Hisense Model	DH5S452BW
Drying capacity	4.5 Cu.ft
Energy Class	Energy Star Tested
Safety Certificate	UL
