8 bottles capacity\*

Main du sommelier  
Anti-vibration technology

\* NOTE : Maximum capacity of 6 bottles at the bottom of the wine cellar

## EUROCAVE'S ADVANTAGES

**Temperature** : Above-average insulation ensures that your wine cellar maintains a constant temperature, allowing your wine to reach its full potential.

**Hygrometry** : Its 6 cm insulation allows the compressor to start up less often, and therefore to dry out your cellar less.

**Absence of vibration** : Like a jewel box, the "Main Du Sommelier" supports hug and isolate each bottle from any disturbance (anti-vibration technology)..

**Air circulation** : Constant air renewal prevents mold in your cellar. EuroCave cellars benefit from a 100% active window well ventilation system, making them very similar to natural cellar ventilation.

**Darkness** : Ultraviolet (UV) rays in natural and artificial light are harmful to wine. That's why EuroCave offers you solid or glass doors with double anti-UV thermos to protect your bottles.
