## EUROCAVE'S ADVANTAGES

**Temperature** : Above-average insulation ensures that your wine cellar maintains a constant temperature, allowing your champagne to reach its full potential.

**Hygrometry** : Its 6 cm insulation allows the compressor to start up less often, and therefore to dry out your cellar less.

**The right support** : These brushed stainless steel shelf supports, trimmed in iridescent champagne leather, provide a luxurious setting for your bottles. Removable, suitable for all formats, and equipped with a silent closing system, they guarantee optimal, secure storage.

**Air circulation** : Constant air renewal prevents mold in your cellar. EuroCave cellars benefit from a 100% active window well ventilation system, making them very similar to natural cellar ventilation.

**Darkness** : Ultraviolet (UV) rays in natural and artificial light are harmful to champagne. That's why EuroCave offers you solid or glass doors with double anti-UV thermos to protect your bottles.
