RGB Mini-LED AI TV 180Hz–Google TV

The Hisense UR9SG introduces a new flagship tier powered by RGB MiniLED, the next generation of TV display technology. Achieving up to 100% BT.2020 colour coverage, it delivers an exceptionally wide colour spectrum. With a 180Hz refresh rate, Hi-View AI Engine PRO, and an Obsidian Panel delivering up to 3× deeper blacks with ultra-low reflections, every scene looks incredibly clear and lifelike.

RGB RGB MiniLED

Mini-LED Hisense, the origin of RGB MiniLED, the next generation of TV display technology, uses independent red, green and blue LEDs to precisely control colour and brightness. This delivers purer colours, deeper contrast, and higher brightness than conventional MiniLED TVs that rely on white or blue LEDs.

Obsidian Panel Anti-Reflection

Delivers up to 3× deeper blacks and higher contrast, so you can enjoy clearer details even in bright daylight. The Obsidian Panel reduces reflections to just 1.5–1.8% by absorbing ambient light.

100% BT.2020 Colour Coverage

Hisense RGB MiniLED technology achieves up to 100% BT.2020 colour coverage, an advanced TV colour standard that enables a much wider range of vivid and lifelike colours in every scene, all without the need for Quantum Dot film.

Native 180Hz Game Mode

Serious gamers wanted! With a winning combination of technology, 180Hz Game Mode is the one to beat. A variable refresh rate from 48Hz to 180Hz ensures that your console and PC gaming will meet any opponent head on. AMD FreeSync™ Premium Pro and Auto Low Latency Mode virtually eliminate screen tearing and controller input lag. Dominate the game – it's time to level up!

180Hz 180Hz Refresh Rate

Whether it's sports, action movies or pure gaming, this high frame rate greatly reduces motion blur to reproduce a clearer picture.

Full Array Local Dimming

Equipped with dimming zones combined with state-of-the-art video processing, the results deliver a striking contrast with intense black levels and vibrant colour reproduction.

AI Hisense AI TV

Hisense Hi-View AI Engine PRO processor enhances every frame with advanced scene recognition, optimizing skin tones, graphics, and contrast for lifelike visuals. It also intelligently enhances sound and energy efficiency for a truly immersive experience.

Dolby Atmos Sound (4.1.2 Channel with Built-in Subwoofer)

Elevate your auditory experience with Dolby Atmos, an award-winning audio technology that reveals details you've never heard before. Enjoy immersive sound with a 4.1.2 channel system featuring two main, two surround and two up-firing channels, plus a built-in subwoofer for powerful bass.
